EXECUTIVE SUMMARY

Informatics Engineering student at Riau University with a strong enthusiasm for machine learning and data analysis. I am highly interested in applying these fields to solve real-world problems, while continuously developing adaptive communication, collaboration, and analytical problem-solving skills to support effective decision-making.

EDUCATION

Bachelor of Informatics Engineering, Universitas Riau 2023 - Present

- GPA: 3.81
- Coursework: Database Architecture, Deep Learning Architecture, Math for Statistic

EXPERIENCES

- **Artificial Intelligence Teaching Assistant– Universitas Riau** 2026 - Present
Facilitated AI laboratory sessions covering AI concepts, algorithms, and machine learning, while evaluating practical assignments.
- **AI Engineer Cohort – Coding Camp powered by DBS Foundation & Dicoding** 2026
Distinguished of an intensive AI Engineering program covering deep learning, model development, and practical AI customization.
- **Database Teaching Assistant – Universitas Riau** 2026
Facilitated laboratory sessions and mentored students in SQL, relational database design, and ER modeling. Evaluated practical assignments and final projects on database normalization.
- **Software Engineer – LPPM Universitas Riau** 2025
Developed a Retrieval-Augmented Generation (RAG)-based chatbot for an information system providing announcements and user guidance.
- **Machine Learning Cohort – Asah Led by Dicoding with Accenture** 2025
Distinguished Graduate of an intensive training program covering machine learning fundamentals, data preprocessing, model development, and Machine Learning Operations.
- **Project-Based Internship – Home Credit Indonesia** 2025
Developed a credit scoring model using customer data to assess creditworthiness and support risk-based lending decisions.
- **Linear Regression Training Program – Yandex & Digitalent Scholarship** 2025
Completed a structured four-stage program covering micro skill, fundamentals, practical application, and mini-hackathon focused on linear regression modelling.

AWARDS

- **Distinguished Graduate – Coding Camp powered by DBS Foundation & Dicoding** 2026
Achieved Top 10% among 700+ participants in the Machine Learning Cohort.
- **Distinguished Graduate – Asah Led by Dicoding with Accenture** 2025
Achieved Top 10% among 1,000+ participants in the AI Engineer Cohort.

SKILLS

Language: Bahasa Indonesia (Native), English (Professional Proficiency)

Programming: Python, Scikit-Learn, Tensorflow, Next.js, Flutter

Software & Tools: Microsoft Office (Word, Excel, PowerPoint)

Others: Problem Solving, Critical Thinking, Communication, Self-Learning
